

S8 Escape™

Compact without compromise

The S8 Escape CPAP is a competitively priced standard device with an advanced set of features that will give you and your patients more freedom than ever:

- Small, lightweight, robust, and travel-friendly.
- 12V and 24V DC power input via ResMed's 12V DC converter and automatic international power switching.
- Flexible patient management capabilities including the ResScan™ Data Card that interacts with ResMed's PC-based patient management system.
- ResMed's exclusive Patient Reminder System provides increased business efficiencies and expanded revenue opportunities.
- A unique combination of patient management and system features provides you with your very own 'Personal Assistant'.

Flexible communication solutions

ResMed's exclusive patient management system brings a more flexible, communication solution to CPAP therapy. Sleep professionals now have the option of managing therapy remotely or directly through the device, or via the ResScan Data Card using ResMed's PC applications.

ResScan Data Card

- Gain remote access to stored patient data.
- Update settings remotely.
- Interface with ResMed's PC application.
- Recognizes the current device. Settings can be specifically targeted to a particular patient.
- Rest assured—acts as the secure conduit for data transfer.

Unique in-built Patient Reminder System

The customizable reminders in the S8 Escape are set by the professional and lets patients know when they need to:

- contact the physician or home care provider
- replace the filter
- order a new mask
- service the device
- return their ResScan Data Card.

This exclusive feature allows you to optimize patient management and increase trailing revenues.

Perfect for patients

- Compact design—unobtrusive in the bedroom and easily packed for travel
- 12V and 24V DC input—broad application
- 4-band altitude setting—freedom to travel
- Ramp setting function—0–45 minutes in 5 minute increments
- Patient-friendly menu
- System with smallest footprint on the market

Perfect for sleep professionals

- Patient Reminder System—improves patient management and trailing revenue opportunities.
- Designed to integrate with upcoming systems.
- Modular design—provides streamlined inventory management.
- ResScan Data Card—accommodates changing business practices. Facilitates adoption of therapy. Patients and clinicians can access data easily, while therapy can also be professionally set anytime, anywhere.
- Serial port access only when required—provides greater patient access control for clinician.

S8 Escape (with Data Card) Product codes

Americas 33007

Technical specifications

Performance

Operating pressure range (manual altitude adjustment)
4–20 cm H₂O

Data storage

Used hours and usage days available from flow generator. Usage days for the 180 most recent sessions available locally and remotely via PC application

Dimensions (H x W x D)

4.6 in x 6.5 in x 5.7 in
(112 mm x 164 mm x 145 mm)

Weight

Flow generator: 2.9 lbs (1.3 kg)

Power supply input range

100–240V AC, 50/60Hz, 12–24V DC

Please refer to the User's Manual for details about power consumption values for typical treatment conditions.

Housing construction

Flame retardant engineering thermoplastic

Environmental conditions

Operating temperature: +41 to +104°F (+5 to +40°C)

Air filter

Two-layered, powder-bonded, polyester non-woven fiber

Air tubing

Flexible plastic, 6'6" (2m) length

Classification

Class II (double insulated), Type CF

IPX1

US FCC Part 15, Class B*

*Consult the medical department of the carrier before using on an aircraft.
